

The Environmental Impact of our Food

Lisa Kiefer
Final Project Presentation
CS150 -Mike Ryu

Quick Survvery

Why does it matter?

Food is responsible for:

30% global greenhouse gas emissions

40% of the habitable land used

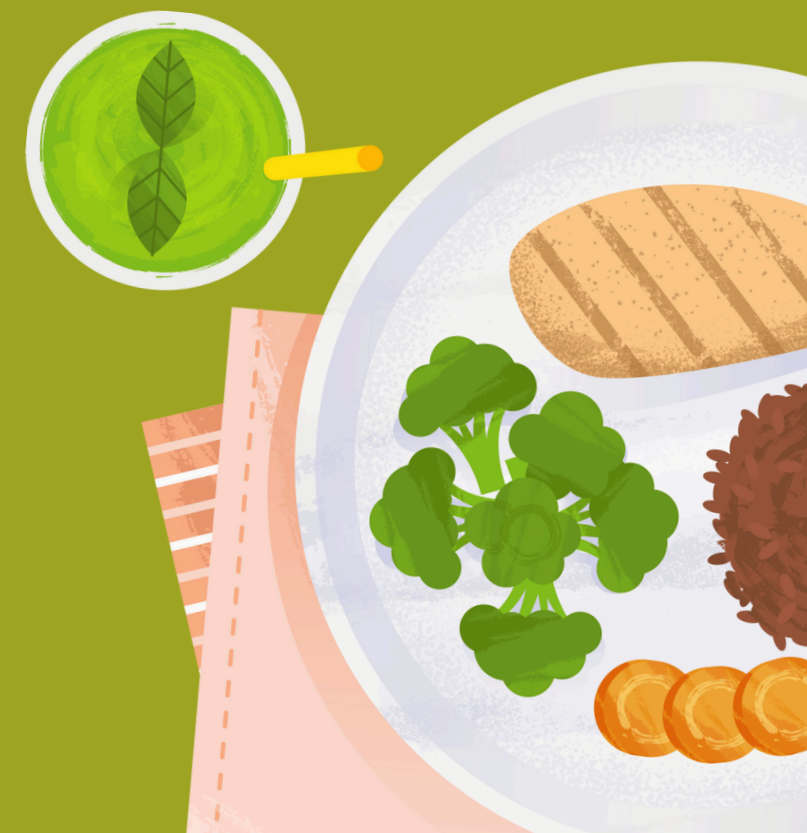

70% of the global water usage

BUT...

Food = all lot of different items...

How do they differ in their
environmental impact?

LET'S FIND OUT :)

Moving forward

Tips for eating more sustainable

be mindful of resource intensive products

minimize food waste

Balance is key!
